

RABEEN SHARMA

Backend Developer | Full Stack Developer

rabeensharma888@gmail.com | +9779814820958

GitHub: github.com/codewithrabeen | LinkedIn: Rabeen Sharma | Kathmandu, Nepal

PROFESSIONAL SUMMARY

Backend / Full Stack Developer specializing in Node.js, Express.js, Next.js, PostgreSQL, MongoDB, and React. Experienced in building scalable REST APIs, authentication systems, and modern full-stack web applications. Passionate about writing clean, maintainable code and solving real-world problems. Seeking a Backend or Full Stack Developer internship.

TECHNICAL SKILLS

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Frontend: React.js, Next.js, React Native, HTML5, CSS3, JavaScript, TypeScript

Database: PostgreSQL, MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, Vercel, Neon, Stripe, VS Code, Android Studio

Programming Languages

JavaScript, TypeScript, Python, PHP, Java, C/C++

PROJECT EXPERIENCE

QuickBasket Nepal (PERN Stack)

Tech: Next.js • Node.js • Express.js • PostgreSQL • JWT • Stripe • Vercel

- Developed a full-stack grocery delivery platform using Next.js, Node.js, Express.js, and PostgreSQL, featuring authentication, product catalog, cart, checkout, and order tracking.
- Implemented JWT-based authentication and role-based authorization.
- Integrated secure payment gateway and scalable REST APIs.
- Built a responsive, mobile-first UI optimized for desktop and mobile devices, delivering a smooth shopping experience across all screen sizes.

GitHub: <https://github.com/codewithrabeen/Grocery-Delivery.git>

Auth CRUD Application (MERN Stack)

Tech: React.js • Node.js • MongoDB • Express.js • JWT

- Developed secure authentication system using JWT and bcrypt
- Handled 100+ simulated user records with CRUD operations
- Reduced API response time by ~30% using optimized queries
- Designed scalable REST APIs following industry practices

GitHub: <https://github.com/codewithrabeen/MERN-Auth-CRUD.git>

Todo App (MERN Stack)

Tech: React.js • Node.js • MongoDB • Express.js • JWT

- Created secure task management system with protected routes
- Improved load performance by ~25% through efficient state handling
- Delivered smooth UX with responsive design

GitHub: <https://github.com/codewithrabeen/MERN-Todo-App-with-JWT-Authentication.git>

Currency Converter App (MERN Stack)

Tech: React.js • Node.js • MongoDB • Express.js

- Integrated real-time API with accurate exchange rates
- Optimized frontend rendering for faster updates (~20% faster UI response)

GitHub: <https://github.com/codewithrabeen/Currency-Converter.git>

User Management System (MERN Stack)

Tech: React.js • Node.js • MongoDB • Express.js • JWT

- Developed a full-stack user management system with secure authentication, authorization, and complete CRUD functionality.
- Built scalable REST APIs using Node.js, Express.js, and MongoDB to efficiently manage user data.
- Implemented JWT-based authentication and role-based access control to protect sensitive routes and user information.
- Designed a responsive interface with optimized database queries and modular backend architecture for improved performance and maintainability.

GitHub: <https://github.com/codewithrabeen/User-Management-System-MERN-CRUD-.git>

KEY ACHIEVEMENTS

- Built 5+ full-stack web applications using MERN and PERN stacks.
- Developed scalable REST APIs with JWT authentication and role-based authorization.
- Improved application performance by 20–40% through optimized database queries and modular architecture.
- Applied clean coding principles to build maintainable and scalable software.

EDUCATION

Bachelors in Information Technology (BIT)

Amrit Science Campus (ASCOL) | Expected 2027

CORE STRENGTHS

- Problem Solving

- Fast Learner
- Team Collaboration
- Communication
